Camping - conducted by Tinaroo EEC Staff

**Note:** This template may be used in combination with a Curriculum Activity Risk Assessment (CARA) guideline or for an activity for which no guideline exists. Queensland state school staff are encouraged to prepare CARAs on OneSchool.

Activity Description: Students camp in tents on designated tent banks at the Tinaroo Environmental Education Centre. There is access to transport, communication facilities, toilets, showers and kitchen facilities. 

Camping using Bivvy style accommodation at designated sites with access to communication and limited facilities: 

*ie: access to transport and amenities.*

Teachers/Leaders: Qualified Tinaroo EEC staff

Class groups: Various usually Yr P - Yr 12

No. of students (approx): 30

Start date: 01/01/2017

Finish Date: 31/12/2017

Supervision ratio (approx): 1:15

---

**Use this risk assessment matrix as a guide to assess the inherent risk level. Refer to the Risk Assessment Information Sheet for further details.**

| Extreme             | ✅ Consider conducting an alternative activity.  
|                     | ✅ A Curriculum Activity Risk Assessment **must** be completed.  
|                     | ✅ Principal approval is required prior to conducting this activity.  
|                     | ✅ Parental permission **must** be obtained for student participation.  
|                     | ✅ Once approved, activity details are to be entered into the School Curriculum Activity Register.  |

**Minimum supervision**

- Adequate adult supervision must be provided. A broad range of variables will affect your decision about what constitutes adequate supervision, for example:
  - nature of the activity conducted
  - number of students/size of groups, if more than one group
  - needs of students and their expected capabilities (i.e. experience, competence, fitness)
  - the leaders’ experience
  - planned duration of the activity
  - suitability and availability of equipment
  - environmental and weather conditions
  - difficulties/distance/condition of the venue/site of the activity (e.g. trails, vehicle tracks, roads)
  - remoteness of the activity
  - likelihood of leader becoming incapacitated or separated from participants.

- If an adult other than a registered teacher is engaged for instruction, a teacher should be present to take overall responsibility. Blue Card requirements must be adhered to.

**Please provide information on supervision:**

All instructors are Tinaroo EEC teachers who have been assessed as competent to lead the sessions through TEEC staff induction and annual validation process. The staff induction and annual validation process involves in-house and external professional development, creation of individual performance plans and monitoring of personal logs.

**Minimum activity-specific qualifications for supervisors**

Relevant qualifications will depend on the nature of the activity, but as a minimum you should consider:

- that there are sufficient adults with current First Aid qualifications including Cardio Pulmonary Resuscitation (CPR) or ready access to first aid facilities, including qualified personnel
- if operating more than one hour away from Emergency Services, current Remote Area First Aid
- depending on the nature of the activity, ‘competence’ may be sufficient for the activity leader rather than a formal qualification. A teacher/leader could demonstrate a reasonable level of competence by two or more of the following:
  - knowledge of the activity and the associated hazards and risks
  - experience (i.e. previous involvement) in undertaking the activity
  - demonstrated ability and/or expertise to undertake the activity
  - possession of qualifications related to the activity.
- if the activity is being conducted by external leaders, obtain a copy of relevant qualifications and risk management information.

**Please provide information on the leader’s/ supervisor’s relevant qualifications or competence:**
Please provide information on the leader's/supervisor's relevant qualifications or competence:

* Demonstrated skills and currency that meet the leadership, group management, technical capacities and safety requirements (including familiarity of the environment, map coverage of the area and emergency procedures by all adult participants) of the specific circumstances being addressed

*A statement of attainment or qualification from a Registered Training Organisation (RTO) including the following field operations units of competence or equivalent:
  - SROOPS006B/SISOOPS202A Use and maintain a temporary or overnight site
  - SROOPS001B/SISOOPS201A Minimise environmental impact
  - SROOPS004B/SISOOPS306A Interpret weather conditions in the field,

Minimum activity-specific equipment/facilities

Consider the equipment and facilities required for the activity. Depending on the nature of the activity, this may include:

- First Aid kit (including sufficient and suitable bandages, ice packs, etc as appropriate)
- Communication equipment e.g. phone line at location, mobile phone, satellite phone, whistle/marine whistle, walkie talkie/UHF/VHF radio, PLB (personal locator beacon)
- Drinking water (students should not share drinking containers)
- Sun safety equipment if outdoors (hat, sunscreen, shirt, shade, etc)
- Appropriate clothing (consider weather conditions if outdoors)
- Injury management procedure (including head injuries where this is a possibility) in place
- Suitable personal protective equipment
- All equipment and facilities should comply with relevant safety standards.

Please provide information on activity-specific equipment/facilities:

General camping equipment, safety gear, route card etc. is provided by TEEC. All other personal gear is provided by students.

Governing bodies/associations

- Guidelines/codes of practice are available for many activities. Refer to the relevant governing body/association, if one exists.
- If you are organising sporting competitions or events, refer to Queensland School Sport Unit.

Please provide information on governing bodies/associations, if relevant:

Swimming, Recreation – Curriculum Activity Risk Assessment guideline
Activity-specific hazards/risks and suggested control measures

Consider the potential hazards and risks involved with this activity and control measures that will be implemented to minimise these risks. Depending on the nature of the activity, this may include:

- establish processes to maintain safe hygiene standards
- be prepared to deal with student injuries/accidents involving bodily fluids that are possible given the nature of the activity and students. Ensure familiarity with Management of Prescribed Contagious Conditions and Infection Control Guideline.
- provide instruction in rules, safety procedures, safe handling of equipment, and prerequisite skills before students commence the activity
- follow progressive and sequential skills development
- monitor student numbers and available space
- provide complete safety instructions on the use of all equipment
- if outdoors, adopt sun-safe strategies, e.g: schedule activity early morning/late afternoon; shaded areas; hats, sun-smart clothing, sunscreen
- check site for hazards and implement controls as necessary
- check site for poisonous plants/dangerous animals
- establish safe, designated areas for people and vehicles
- refer to Chemical Hazards in the Curriculum guideline and related Guidance Notes if hazardous substances are being used
- establish safety zones for use of equipment, if relevant
- ensure electrical items are maintained as required, and visually inspected before use
- if students with medical conditions are involved, ensure that relevant medical/emergency plans and medications are available (insulin, Ventolin®, Epipen®, etc)
- refer to Individual Education Plan/Educational Adjustment Plan/Behaviour Management Plan and other student documents
- where necessary, obtain advice from relevant advisory visiting teachers or specialist teachers
- if the activity involves manual tasks, undertake a risk management process to prevent or minimise the risk of injuries
- procedures should be put in place to ban, dissuade or protect (e.g. tape) the wearing of jewellery
- for sporting activities:
  - assess suitability of surface/playing field (loose items, debris, potholes/divots in ground, line markers, or other hazards) and dampness before and during activity, and that the surface is non-slip, even and firm
  - modify activities to match the skill and fitness levels of students
  - have appropriate warm-up and warm-down activities
  - continually monitor students for signs of fatigue and exhaustion
  - if spectacles need to be worn during sports activities/matches and training sessions, ensure that they have plastic frames and plastic lenses. A band should also hold the spectacles on securely.
- for outdoor activities:
  - assess weather conditions before and during activity (e.g. temperature, storms)
  - site activities away from buildings, pedestrians and other activities (as appropriate)
  - consider hazards associated with types of fencing materials, gates and other infrastructure (e.g. barbed wire, star pickets, electrified fencing, rough timber, uneven terrain) and the risk of students being injured by these materials and conditions.

Please provide information on hazards/risks and planned control measures:
Please provide information on hazards/risks and planned control measures:

Detailed risk management guidelines for this activity are outlined in the Tinaroo EEC Standard Operating Procedures.
Approval

☑ Approved as submitted

☐ Approved with the following conditions:

☐ Not approved for the following reasons:

By: Peter MacGregor  Designation: Principal

Signed: [Signature]

Date: 23 Nov 16

Reference No. 9

Once approved, activity details should be entered into the School Curriculum Activity Register by administrative staff.

Monitor and Review (to be completed during and/or after the activity.)
